Re: Oil and Gas Leasing Program for the Coastal Plain of the Arctic National Wildlife Refuge.

Dear Ms. Hayes,

Few places left on earth are as special as the Arctic National Wildlife Refuge. The coastal plain of the Arctic Refuge are the calving grounds of the Porcupine Caribou herd, which is integral to the culture and subsistence ways of life of Indigenous peoples across northern Canada and Alaska.

The Arctic Refuge is internationally important. The Porcupine caribou herd is critical to the human rights of Gwich'in living in Canada. The climate impacts of burning a new fossil fuel reserve would have impacts across the globe. Meanwhile, migratory birds connect the Arctic Refuge to places as distant as Antarctica and Argentina. Bar-tailed Godwits and Dunlin even migrate from the Arctic Refuge through Japan. The U.S. Government needs to listen to voices around the world as it makes decisions on the Arctic Refuge's future. I am strongly opposed to oil and gas extraction in the Arctic Refuge.
