Re: Comments Draft Environmental Impact Statement for the Coastal Plain Oil and Gas Leasing Program, Alaska.

Dear Ms. Hayes,

The Bureau of Land Management's Draft Environmental Impact Statement (DEIS) fails to address the environmental and cultural damage that could be caused by oil drilling in the Arctic Refuge. The BLM does not consider any Gwich'in communities within Canada when determining who could be 'appreciable affected' by changes to the Porcupine caribou herd. The DEIS fails to quantitatively assess the impacts of drilling on the Porcupine caribou herd. The BLM states that caribou would experience no major impacts from oil drilling, but provides little evidence to back up this claim. The BLM almost completely ignores the transboundary impacts that oil and gas drilling in the Arctic Refuge would have on Canada. The BLM must comprehensively address the direct, indirect, cumulative and transboundary impacts of drilling in the Arctic Refuge.
