Coastal Plain Oil and Gas leasing Program EIS

To whom it may concern,

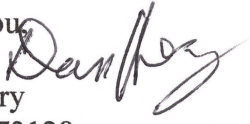

Please permit the oil and gas drilling to proceed in the Arctic Refuge.

I have lived in the great state of Alaska for 60 years. Love Alaska. Love our abundant wildlife.

On the north slope oil development can and does co exist with wildlife. Oil development works alongside habitat conservation.

Currently the Arctic Refuge is accusable only to the rich. Oil development has helped all Alaskans have a better life. Oil drilling creates thousands of jobs and billions of dollars to local governments.

Thank you,

Dan Henry
